

Satellite and Terrestrial Broadcast 4K, HEVC Encoders

- High video quality up to 4K
- Low bandwidth consumption
- Low cost
- High reliability
- Low delay
- Audio video synchronization
- High availability
- Supports most popular compression standards such as MPEG2, MPEG4/H.264 and HEVC/H.265
- IP and ASI outputs
- Optional integrated modulator for satellite DVB-S/S2/S2X and terrestrial DVB-T/T2 RF outputs
- Optional encrypted output
- Optional ProMPEG FEC output for error correction over IP network transmissions
- Available in multiple combination of features, physical dimensions, video quality and resolution, power consumption, power supply type, etc.

Professional Audio
Video Encoders
